

June 2023

Summary

Progress continues on the Health System Catalogue. The HSC now has a total of 157 medical device suppliers providing a total of over 170,000 GTINs.

We continue to work with an additional 63 suppliers to get data sets complete for publishing. Focus also continues on getting pricing information from suppliers who have only published item data.

We have completed testing of loading and viewing images and documents and will begin to ingest these soon. We will be adding new product categories to the HSC soon and working with a wider range of suppliers to source data for those.

Thank you for your ongoing support as we continue to support the development of the Health System Catalogue with Te Whatu Ora - Health New Zealand.

Progress Update

- We continue to work closely with Te Whatu Ora to onboard suppliers and data through the [GS1 National Product Catalogue](#).
- Te Whatu Ora will also utilise GS1's MediaLibrary which will allow them to bring in images and documents to enhance the product information in the HSC.
- Te Whatu Ora is progressing their adoption campaign, which involves working closely with Te Whatu Ora Districts to increase the use of, and value delivered by, the Health System Catalogue.
- Escalations will now commence within Te Whatu Ora for Suppliers who have not met the time expectations for publishing complete data sets to the HSC.

For further information or enquiries, please contact sharon.coad@gs1nz.org

COMPLETED (since last update)

- There are now a total of 157 Suppliers who have provided product data.
- A further 63 medical device suppliers are engaged and preparing data.
- Testing completed for images and documents.
- The scope for Additional Product Categories is now defined and Te Whatu Ora will commence engagement with Suppliers.

PLANNED (for next period)

- Continue to get product & pricing data.
- Continue to match items, suppliers, pricing into the HSC master catalogue for districts to easily search
- Work with early adopter suppliers to ingest images and other product documents in the HSC.
- Commence data collection for additional product categories.

Timeframes for publishing data to the HSC

National Contracted Suppliers:

The timeframe for National Contracted Suppliers to publish their item and pricing data to the HSC **was 31-Dec-22**, and there are still a large number who have not published data or have only provided item information. In order to increase our match rates with other data sources, it is critical that we get a complete set of item and price data as soon as possible. Discussions and follow-up with individual suppliers will now be escalated within Te Whatu Ora and PHARMAC. Please contact GS1 to progress the publishing of your complete data set.

All other Medical Device Suppliers:

The timeframe for all other medical device suppliers to publish their data to HSC (product and price information) is **30-Jun-23**, which is fast approaching. For suppliers who have already provided data to the HSC, please ensure you load your complete data sets, including price information. If you have any questions or would like to discuss further, please contact Sharon Coad, GS1's Engagement Lead at sharon.coad@gs1nz.org

Additional Product Categories

The scope of Additional Product categories is now finalised, and Te Whatu Ora have commenced discussions with a wider group of product suppliers. GS1 will continue to work closely with industry groups and an extended supplier base.

In broad terms, the additional categories include most products that are routinely purchased and used in Te Whatu Ora hospitals, including medicines.

If you would like assistance to prepare and publish your product data, please contact Sharon Coad, GS1's Engagement Lead at sharon.coad@gs1nz.org

Images, Product Specifications and Documents

The development of functionality to support the inclusion of images, technical specifications and other documents is now complete.

We will be working with a few early adopter suppliers, who have indicated that they would be happy to provide images and other documents to the HSC. As part of the adoption campaign, Te Whatu Ora will work with their District users to identify the most beneficial documents for inclusion in the HSC. These will include safety data sheets, products specifications, regulatory information and certifications.

We look forward to assisting with this functionality as it provides additional value to users of the HSC as well as further developing the HSC as the central source of all product related information.

GS1 New Zealand's Product Photography

GS1 New Zealand offers professional product photography services especially for the HSC. Use our photography services with Media Library, the perfect partnership to manage all your images. [More information](#)
