

Summary of Progress

Progress continues to be made. 23 suppliers now have their products “live” in the Health System Catalogue. This gives our customers 85,684 “active” products to search and view. DHBs have started searching the HSC for product information and we continue to work with Suppliers to source more items and price data as we progress the development of the HSC. Early in 2022, a further 14 Suppliers have published data to the GS1 National Product Catalogue, this will be loaded into the live HSC system shortly. Many more suppliers are now in the final stages of data gathering.

Thank you for your ongoing support as we continue to develop the Health System Catalogue to support the NZ Health System.

HSC Progress Update

- Our initial focus was to get a solid foundation of product data into the HSC for the “View” phase, which was achieved.
- We are now managing 4 concurrent engagement streams with Suppliers:
 - **Suppliers who have published data** – For suppliers who have published item data only, we will work with them to get prices and extended product ranges published.
 - **Suppliers who are engaged but have not published data** – We will work with these suppliers to get item and price data as soon as practicable.
 - **Suppliers who responded to the open invitation (Nov-21)** – We will work with these suppliers to determine their product scope, match with the HSC, and progress data onboarding.
 - We will also continue to pro-actively approach other Medical Device Suppliers to formally invite them to work through the onboarding and data collection process.
- Configuration of the Supplier Portal is nearly complete, this will allow some suppliers to publish data directly to the HSC. We expect to be able to ingest data from the end of Apr-22.
- DHB onboarding to the HSC is now progressing in a systematic phased approach.
- Discussions continue with Onelink and GS1 to develop a process for logistics and supply chain providers. We are hoping to test an initial solution by the end of Apr-22.

For further information or enquiries, please contact hsc@nzhp.health.nz

COMPLETED (since last update)

- On 17 Dec 21, our first group of DHBs accessed HSC to search and view supplier items.
- A total of 85,684 “active” products were published to the HSC.

PLANNED (for next period)

- Continue onboarding of Suppliers, item and pricing information.
- Finalisation of the HSC Supplier Portal.
- Progress the process for logistics and supply chain providers.
- Match and merge other data sources to create master records in the HSC.

DHBs with access to the HSC

Following the initial go-live in Dec-21, the Health System Catalogue continues to grow. In conjunction with this ongoing development, we are working through a progressive onboarding approach with DHBs. This process includes an onboarding, familiarisation and training stage, followed by go-live and support. Outlined below are the DHBs who have access as at the end of Mar-22, as well as those who are currently scheduled for onboarding over the two months.

Live:

MidCentral (Dec-21)
Waikato (Jan-22)
Bay of Plenty (Mar-22)
Canterbury (Mar-22)
West Coast (Mar-22)

Scheduled:

Whanganui (Apr-22)
Lakes (Apr-22)
Hawkes Bay (Apr-22)
Northland (Apr-22)
Waitemata (Apr-22)
Counties Manukau (May-22)
Auckland (May-22)
Southern (May-22)

Suppliers who have published data through GS1

Thank you to all the Medical Device Suppliers who have been working with us to publish product and pricing information. A special thanks to the 37 Suppliers outlined below, who have published data to the GS1 National Product Catalogue as at 16 Mar-22.
